

TGK GOLD COIN

A BERING SEA OF POSSIBILITIES

WHITE PAPER FOR TGK GOLD COIN CONTRACTS

v. 1.37 (ENG)
February 2021

INTRODUCTION

TGK Gold LLC is an Alaska Marine Gold Mining Company, a GOLD Mining Company located in Alaska Nome City. TGK has the right to operate the Gold Mine field 23,000 acres (93 million square meters) in the Nome City Ocean, licensed by the state of Alaska. The founder of TGK, which began in 2006, is said to be one of the most successful miners in the recent history of Nome City, Alaska. Based on his experience and expertise, TGK plans to become the most powerful of the top five mining operators in Alaska by 2025.

EXTENDING MINING AND FINANCING OF MARINE GOLD

Funding the construction of a gold mining operation is expensive:

TGK Gold LLC is an Alaska marine gold mining company that owns the right to operate gold mining in a large area of sea. So every year, we're trying to increase our gold production by expanding the mining area of marine minerals to expand our gold production.

In addition, mining equipment itself is a process of picking out gold by pulling soil or rock such as sand or gravel from the seabed. As equipment is lost or consumed badly, new equipment needs to be purchased and newly developed for work use, time and money is required. It takes a lot of capital to buy it, to transport it to the mines, to install it, and to mine gold.

Finding funding for a mining operation can be difficult:

- Many banks on the market do not want to make large loans or make loans other than existing ones until they are not large mining companies. They're also trying to limit the percentage of existing loans extended
- For most, small and medium mining companies, due to a lack of offshore gold mining equipment, the U.S. and Canadian governments cannot meet the requirements of standard yields defined in the conditions of marine gold ore. This means that the profit structure of the balance sheet of the general company is not recognized by the small and medium mining company at the yield of gold.
- Small, medium-sized offshore gold mining companies have low requirements to meet the needs of lenders, which do not fully fit the existing categories required by banks. We specialize in gold mining equipment from the ocean, so far away from Seattle or San Francisco, not Alaska, it's not worth a loan.
- Miners who run small marine gold mining companies are buying equipment to mine gold. As soon as we calculate the gold produced, we want to sell it at a high price.

Buying gold is expensive:

Generally, consumers and enthusiasts who want to buy physical gold have to save money to buy enough gold they want at a reasonable low price. Consumers and lovers are more difficult to buy as the price of gold can go up while they save money to buy gold. Small amounts of small consumers and favorites are limited in their way of buying low prices.

Selling gold in small quantities is time consuming:

Gold mining companies in small marine gold mining companies charge high prices for small quantities of mined gold. Due to the corresponding large number of time and labor-consuming problems, we would prefer to give the wholesale merchant or gold smelter the right to sell and continue to sell the gold. Thus, by changing the distribution structure, the new block chain cipher currency of the structure is used as a medium to invest in the coin and secure the purchasing power of the gold to those who possess the coin. The company aims to attract a wide variety of consumers and enthusiasts and secure mining equipment with funds and use them to mine more.

Business Vision and Objectives

New Technology Convergence Leadership in the Priority of Human Happiness

**the leader of the
4th industrial revolution**

**Future Innovation in
Technology Development**

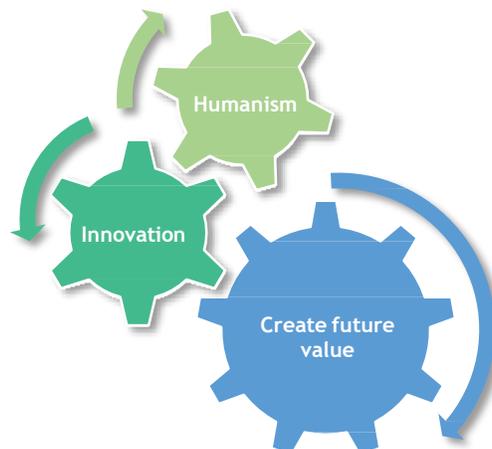

Unlock your thoughts to the world and create your future

New technologies, innovative services, and creative future markets

Establish a stable value connection for customer social executives

New Technology and the Creation of Humanity's Future Compassion

“Innovation for Humanism”

THE SOLUTION

TGK Gold Coin, based in Singapore, issued Blockchain cryptography in partnership with TGK Gold LLC in Alaska Nome City. This is listed on the cryptocurrency exchange, and only those who invest in coin for consumers and lovers who prefer gold can purchase gold within the amount of their own coin ownership. In addition, within two years, the company will be able to purchase gold directly with its own code currency.

We will use block-chain cipher money to invest in stable gold and

offer deep trust and supply schedules to consumers and enthusiasts who own gold with high prices at future asset values. For the TGK Gold Coin holders, we will provide you with a gold supply contract for physical delivery at least in small amounts TGK Gold LLC is an Alaska marine gold mining company that owns the right to

What is a Forward gold contract:

- To provide large capital and operating expenses for the support of mining equipment from the Alaska Ocean Gold Mining Company. The development of new technology from the mining methods of the general mining industry produces and supplies gold steadily and reliably in the long term.
- Our Gold Supplier may deposit the Gold in cash to purchase it, arbitrates and fairly transacts a legally binding bilateral purchase and sale contract between the two parties to buy or sell gold.

- Gold supply contracts in the Gold Trade Agreement are not regulatory security defined by SEC in the United States.
- The Gold Trade Agreement is not a futures deal as defined by the CFTC of the United States.

What is Blockchain Technology:

- Blockchain cryptographic currency is an open ledger that, when moved, messages are recorded and added to the surrounding block and all transactions are digitized (non-centralized) so that anyone can index.
- This distributed ledger technology (DLT) allows anyone to track digital transactions between buyers and sellers through a brief but clear contract. A networked computer to this is available to prove and confirm transactions within the digital cipher currency.
- Documents from all data are digitized, coded, inserted into the block chain to create records that cannot be reversed, changed, and erased. The reliability of records can be found throughout the community using a block chain, rather than a single, controlled central authority.
- Link to Investopedia definition: <https://www.investopedia.com/terms/b/blockchain.asp>
- Transactions between buyers and sellers in smart contracts use the TGK Gold Coin block chain and leverage smart contracts to facilitate contracts, simplifying transactions, increasing efficiency, and reducing administrative costs.

Good for the gold buyer:

- Gold buyers may purchase Gold at a corresponding discount on delayed delivery if Gold's supply and demand is delayed on a future date due to production schedules or device equipment issues (except for natural disasters and weather changes).
- Gold purchasers can purchase gold with a small increase in the amount of money at various discounts.
- Gold buyers can purchase gold directly from mining operations without the cost of bulk trading or transportation of gold.
- Gold purchasers can pay the supplier the average purchase cost of Gold to purchase Gold, and then receive it when the Gold Mining process is completed.

Good for the gold mining operation:

- In Singapore TGK Gold Coin (rcline holds PTE. LTD.) we will provide Alaska Nome City's TGK Gold LLC with expansion funds faster than other companies to increase the production of Gold.
- TGK Gold LLC in Alaska's Nome City is contracted to fund its investment in TGK Gold Coin, and the gold produced in the future is promised to be supplied to TGK Gold Coin.
- The first country to receive Gold is Japan, which hosts TGK Gold Coin as its main supplier, and is scheduled for Hong Kong and South Korea as the next step
- For those who have purchased and own TGK Gold Coin, Alaska

wants to be mutually beneficial to suppliers, consumers and enthusiasts by simply signing off on gold produced by Alaska and supplying it at a discounted, low price.

- For those who own TGK GOLD Coin and purchase Gold, the mining miner will provide and track the overall Gold production records, and supply large or small amounts of gold directly to consumers and enthusiasts without much time.

ABOUT THE BLOCKCHAIN TOKEN

TGK Gold Coin is programmed with Ethereum ERC 20 Source and is intended for use on the Ethereum network. Singapore's rcline Holdings PTE. LTD. published TGK Gold Coin in partnership with Alaska Nome City TGK Gold LLC. The countries that supply TGK Gold Coin are Japan, Korea, Hong Kong, Malaysia, Bahrain, United Arab Emirates, Indonesia, Thailand and Singapore in the United States, Canada and Asia.

TGK Gold Coin aims to benefit consumers and enthusiasts by expanding the mining and expanding the market for gold for consumers and enthusiasts.

Some of the token features will include:

- Currency supply : TGK Gold Coin – 35 million
- Coin name : TGK GOLD Coin
- Coin symbol : TGK
- Currency introduction : TGK Coin for the distribution of Alaska Mining Gold
- Market circulation : 25 million
- Official holdings : 10 million
- Official Website : <https://tgkgold.net/>
- Based Chain : Ethereum ERC 20
- Web Wallet : <http://13.124.229.204/> (OS: iOS, Android, Windows)
- Wallet Android : <http://13.124.229.204/download/com.tgk.wallet.android.apk>
- Block Generation Mechanism : PoW
- Kernel algorithm : Script

- Blockchain servers : Amazon Web Server (AWS)
- Whitepaper : https://tgkgold.net/files/tgk_gold_coin_whitepaper_en.1.37.pdf
- Block size : 1M
- Block Speed : 60 secs
- Exchange Current price : US\$20.00

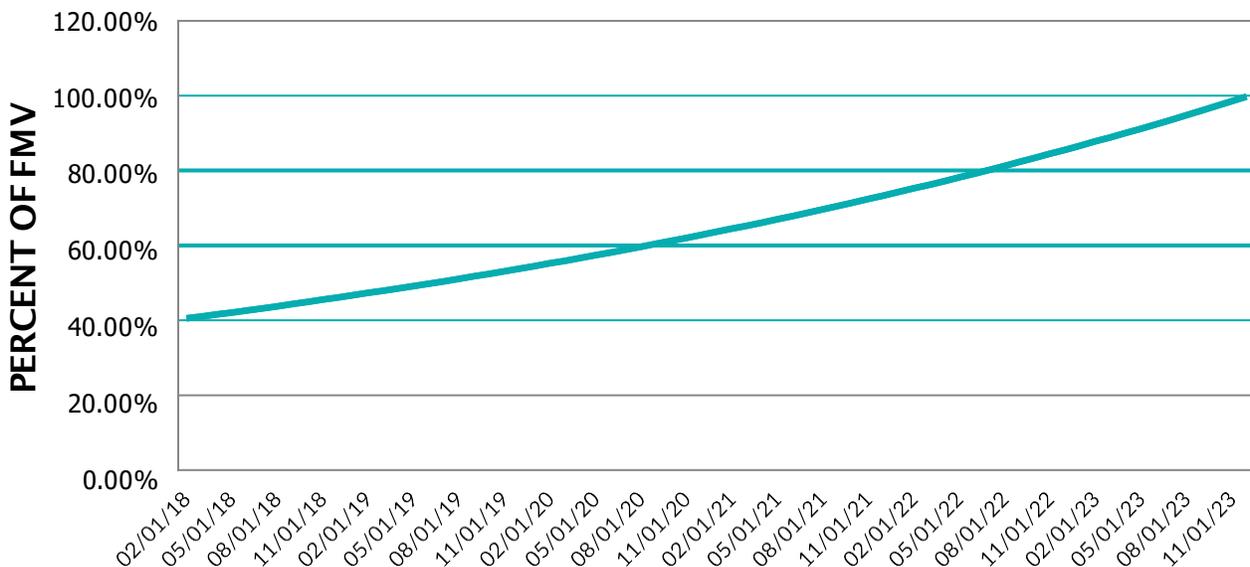

※ Because the price of TGK Gold Coin is set based on the supply in the main market, the target price supplied in US is US\$20.00, and is approaching the target price.

SALE PRICE GOLD:

At TGK Gold Coin, the supply price of gold produced in Alaska is calculated on a daily basis based on the value discount rate of the most recent London PM fixed gold market.

$$\left[\begin{array}{l} \text{London PM} \\ \text{Fix for Gold} \end{array} \right] \div e^{\left(15\% \times \left(\frac{\text{(Number of days from today until December 1, 2023)}}{365.25} \right) \right)}$$

SALE PRICE % OF GOLD PRICE OVER TIME

For example:

Gold buyers who own TGK Gold Coin will be offered a separate purchase guide, the price they purchase will depend on the price changes of the current market price at the time of purchase and will depend on the size of their investment in TGK Gold Coin.

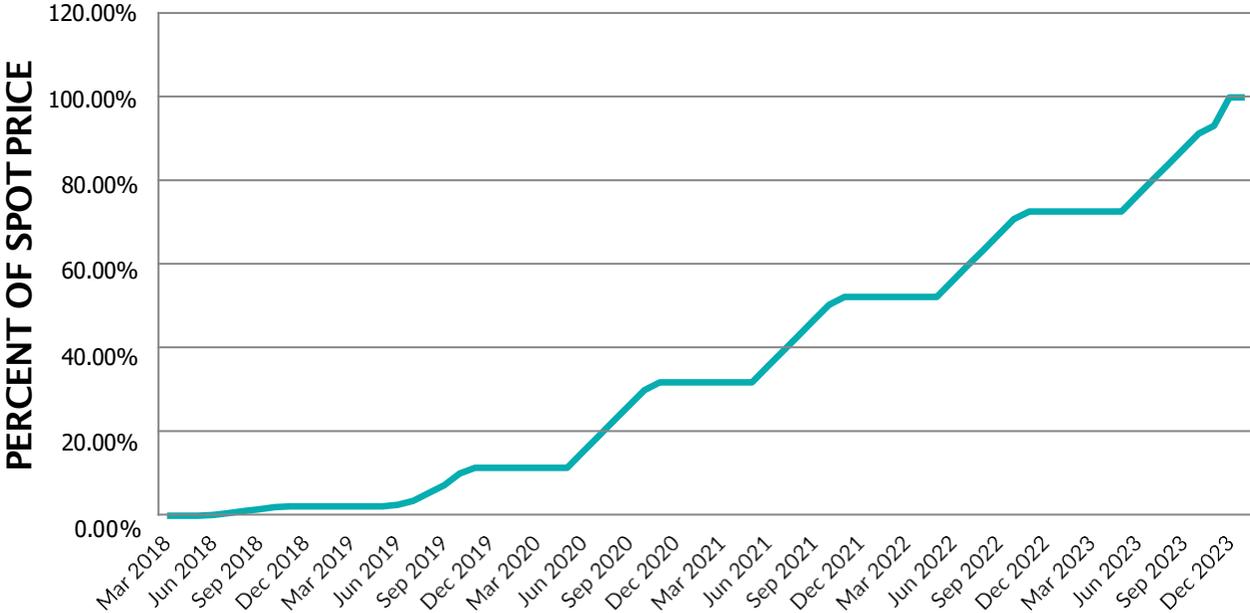

Gold discount rate has not been fixed yet, but we'd like to supply an average of -13% over the London gold price. (-10% to 20% confirmed on the fixed price of London) (Supplied with the same purity of the natural gold produced by the Alaska Nome City)

PURCHASE PRICE:

When booking a gold purchase, TGK Gold Coin will suggest signing a purchase agreement based on the most recent London PM Fix for Gold.

$$\left[\begin{array}{l} \text{London PM} \\ \text{Fix for Gold} \end{array} \right] \times \left(\begin{array}{l} \text{Number of ounces in} \\ \text{Forward Reserve} \end{array} \right) \div \left(\begin{array}{l} \text{Forward Reserve} \\ \text{Target Size} \end{array} \right)$$

**PURCHASE PRICE PROJECTION,
% OF GOLD PRICE OVER TIME**

TGK GOLD LLC HISTORY AND ROAD MAP

- 2006~2019: With 13 years of expertise and experience in the mining industry in Alaska Gold Knushing, (Alaska Nome City) the company has grown from a small operation to one of the largest and most successful companies.
- 2016: Establishment of Gold Mining Company Extension TGK Gold LLC.
- 2016: Completed a gold mine operator contract to mine more than 23,000 acres from gold mining right holders. This is five times as much as the gold mine area off Nome..
- March 2018: Exchange shares with Singapore rcline holds PTE. LTD. Builds and supplies TGK Gold Coin to Japan, contracts with Gold Buyers directly for purchase, and increases capital by selling gold.
- June 2018: Beginning construction of one large marine mining vessel.
- June 2019: Newly built mining ships begin mining for ore off Alaska nome coast.
- June 2019 ~ November 2025: Mining of marine minerals is carried out and purchased gold, part of the gold mined, is stored in a reserve safe.
- January 1, 2020 ~ December 1, 2025: Contract delivery date, actual gold is provided to the purchaser to initiate payment of the contract.

ABOUT THE COMPANY

THE PEOPLE

Gold buyers who own TGK Gold Coin will be offered a separate purchase guide,

★ ANDREW is a 13 year old marine mining gold miner who runs a marine mining workshop in Nome, Alaska, using a variety of marine mining vessels. Most marine mining vessels were designed and built. He holds a degree in computer operation from the University of Alaska Fairbanks. He mined gold with a 6-inch, 8-inch and 10-inch diver and an 18-inch remote-controlled suction-type miner, who owns the mine.

And for 13 years, ANDREW has mined the Norm Gold field in Alaska's oceans. Andrew owns two groups of mining leases off Alaska's coast. One is 16,579 acres and the other is 2,742 acres.

★ REBECCA had three years of experience in marine gold mining mines, six years in corporate management accounting, and two years as a seventh-grade math teacher. She holds a master's degree in accounting and a master's degree in Teaching from Southern Oregon University.

★ CHARLES is an underwater, water welder and flight attendant. His Air Force career covered a variety of skills, including: Contains logistics management, branch managers, production supervisors, project management and air crew. Twenty-two years later, he retired with an E-8 rating. I participated in the Missouri Welding Institute, which is certified for both structural and pipe welding. With his new technology, he was scouted by Prudhoe Bay, Fairbanks, Anchorage and Valdez Alaska. I've had eight years of mining experience.

★ STEPHEN is the Chief Technician responsible for the operation, prevention and maintenance of the supported ships' engines, machinery, electronics, electrical and plumbing systems. He has been retired from the U.S. Navy for more than 20 years, including services to submarines and ground fleets. ABYC Certified Master Technician.

PLANS

- A. TGK Gold Coin (rcline holdings PTE. LTD.) and TGK Gold Mining Company (TGK Gold Mining Company) plan to build and operate three additional mining vessels for the exclusive offshore seabed mine in Alaska with a funding of 35 million dollars.
- B. Each ship of the mining vessel is designed to mine 300 to 600 yards per hour. This is an eightfold increase in production that we worked on in 2017, so we'll expand the volume of gold mining by at least five times, so with a stable supply of gold, we'll meet consumers and enthusiasts who buy gold.
- C. TGK Gold LLC's additional miner ships are designed and will comply with safety, mining and environmental regulations. The mining ships that are being built with rapid financing from TGK Gold Coin (rcline holdings PTE. LTD..) will be in operation in October 2020 and June 2021.
- D. It is building two smaller mining vessels with less initial capacity through partial financing it is providing on its own, and is planning to go ahead with several operational plans with plans to operate additional unmanned mining ships. We will continue with the Gold Supply Agreement for Consumers and Favorites under way at TGK Gold Coin (rcline holdings PTE. LTD.)
- E. As the contract for the supply of gold is currently in progress only in Japan, we are planning to supply it to Korea and Hong Kong when additional mining ships are built and expanded in TGK Gold Mining Company (TGK Gold Mining Company) in Alaska.
- F. As the market expands, we're in the middle of the Middle East, and we'll be able to provide a stable supply once we've completed a new attempt to increase the yield of gold from the TGK Gold Mining Company.

ABOUT GOLD MINING OFFSHORE NOME

TGK Gold LLC. (TGK Gold Mining Company) currently plans to operate several areas of other group-owned marine mining fields.

We can use this ocean view to make a lot of profit for consumers and lovers.

GENERAL DETAILS FOR ALL PROPERTIES:

- Alaska coast is near Norton Sound, Nome, Alaska. From his port, it's about 11.5 miles west, about 5.5 miles east, three miles offshore.
- It passes through the ocean through a navigable waterway connected to Port of Nome or Norton Sound off the coast of Alaska.
- Alaska nome this property is owned by the state of Alaska and has issued mine leases to tenants.
- Tenants renting Alaska nome coast must pay annual rent to the state of Alaska to maintain their lease, and keep in good condition with appropriate records of activities such as gold yield.
- These properties, renting a marine mine off the coast of Alaska, are a contract to maintain long-term use of marine fields.

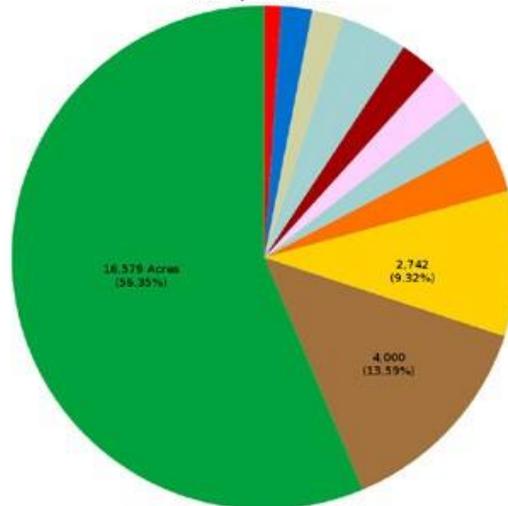

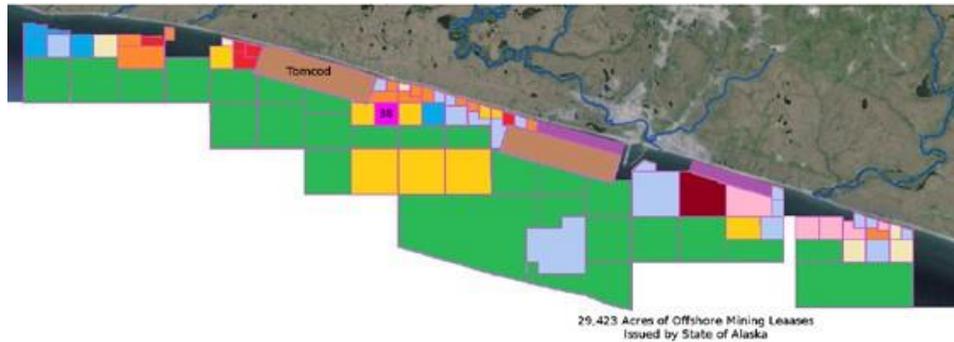

GENERAL HISTORY AND DESCRIPTION OF THE PROPERTIES:

- The United States Geological Survey (USGS) has the following recent reports relating to this area, including significant overlap to the properties:
 - USGS Alaska Resource Data File NM253 https://mrdata.usgs.gov/ardf/show-ardf.php?ardf_num=NM253
 - USGS Mineral Resource Data System ID A012964
 - USGS Deposit ID 10002101 https://mrdata.usgs.gov/mrds/show-mrds.php?dep_id=10002101
- Host Rock type: Unconsolidated Deposit, Sand and Gravel
- Stratigraphic age: Pliocene and Pleistocene
- Rock description: Nome River Till

TGK GOLD LLC. HAS OPERATOR AGREEMENTS FOR THREE GROUPS OF MINING PROPERTIES OFFSHORE NOME, ALASKA.

1. Mining area consists of 26 leases totaling approximately 16,579 acres.
2. Mining area consists of 9 leases totaling approximately 2,742 acres.
3. Mining area consists of 2 leases totaling approximately 4,000 acres.

TERMS AND CONDITIONS

COMPLIANCE

The Gold Supply Agreement under the conditions above and above at TGK Gold Coin is not subject to coin trading or securities regulation in itself, but there are numerous regulations that apply in connection with the transfer and ownership of large amounts of cash. We protect our profits by following KYC (Know Your Customer) and AML (Anti-Money Laundering) protocols. Thank you for your cooperation with TGK Gold Coin in submitting data, particularly in excess of a large amount.

DISCLAIMERS

Transactions between individuals are not recommended with TGK Gold Coin, but some parties understand that they may wish to trade or sell the coins. If the TGK Gold Coin is traded, use block chain technology to prove ownership. When a transaction occurs, you can verify the authenticity of the mutual agreement. TGK Gold Coin is not expected to gain value or have intrinsic value beyond facilitating a gold supply contract. TGK Gold Coin can only be used by token owners and can also be used for agreement contracts for purchased gold.

Ownership or ownership of TGK Gold Coin does not confer ownership, rights or interests in the company, company or business, but may be owned and does not share profits or profits that do not own the delivery contract. For purchased gold, passive ownership of TGK Gold Coin does not expect profit or value.

FUNGIBLE

The gold provided under this contract is replaceable. The value of the contract is for gold content, not forms or sources, as suppliers are natural gold in marine mines nome Alaska. The issuer may replace gold from different sources and has the same weight as the other yield type of gold in Alaska nome, and is in the same purity range as the purchasing contractor requires.

NO ADVICE

TGK Gold Coin does not offer financial advice other than Gold Supply.

DUE DILIGENCE

The price of gold supplied by TGK Gold Coin is rising and falling.

DELIVERY EXPECTATIONS

After purchasing TGK Gold Coin and purchasing Gold under contract, delivery of Gold is possible from the specified date on the contract.

DEFAULT RISK

At TGK Gold Coin, in the unlikely event that gold is not delivered, the holder of the purchase agreement takes numerous remedies through various laws in the United States, the Federal Trade Commission, the Mail Order Law and the Contract Law. In TGK Gold Coin, the holder of the Gold Agreement is the customer and creditor until the completion of the Agreement.

REGULATORY NOTES:

- The Gold Agreement, issued by TGK Gold Coin, is not a regulatory statement as defined by the SEC of the United States.
- SEC enforces and enforces federal laws regulating the sale of securities, such as securities, bonds and mutual funds, but does not regulate futures trading.
- The Commodity Futures Trading Commission (CFTC) of the United States is the Futures Market and the Futures Market. Gifts are standardized and regulated gift contracts. This contract is not a gift contract.
- Gold is an exempt non-agricultural commodity under CEA Section 1a(20) Exempt commodity: The term "exempt commodity" means a commodity that is not an excluded commodity or an agricultural commodity..
- Both the Commodity Exchange Act (the CEA) and CFTC regulations have long recognized a forward contract exclusion from futures contracts.
- CEA Section 1a(47)(B)(ii) Exclusions: The term "swap" does not include any sale of a non-financial commodity or security for deferred shipment or delivery, so long as the transaction is intended to be physically settled.
